The following outlines assumptions related to the Home Configure services:

- The Package is limited to one elevation that is 8,000 or less Total Square Feet.
 - Total Square Feet is based on total Area Under Roof (AUR) + all levels modeled.
- Views
 - Exterior + Interior Spotlight packages receive the exterior plus three (3) 360-degree views including the kitchen, great room, and owner bath.
 - Selections for optional features must be made from the space in which the home component is located (e.g., fireplace changes must be made from great room), even if visible from a different space.
- Provider reserves the right to decline a submission, especially in the case of incomplete details or copyright related concerns that are not addressed in a timely manner.
- For Spotlight Packages Customer will provide a 2D PDF plan including cabinet plans and top-down roof plan for homes to be modeled.
- Accurate modeling and visualization of a home plan requires detailed information from constructable house plans, material examples, and specifications. Customer will provide the necessary information, finish detail specifications, furnishing details (if applicable), documentation, and resources to allow Provider to deliver the above scope. Delays due to incomplete information, extended response times from Customer, or lack of supporting documentation will impact timelines and potentially cost.
- Provider's visualization product is to be delivered as-is. Enhancements to Provider products that may be requested or identified are not included.
- All services represent Provider effort only and are quoted on a Firm Fixed Price basis. Changes to project scope, additional services for new plans, change of finish detail or furnishing choices, significant artistry modification, or failure to meet assumptions may result in changes to cost that will be managed through a Change Request.
